

ICD-10 Readiness Statement

NHI's systems and solutions are ICD-10-compatible. Our edits and rules engines can fully accommodate ICD-10 codes, and we are ready to test ICD-10 related transactions with our clients and vendors as necessary.

We recognize that the challenge of preparing for ICD-10 extends beyond our own systems to yours. NHI's client support team has undergone extensive, in-depth ICD-10 training, ensuring they're equipped to answer ICD-10 questions and comprehensively support your transition to ICD-10. Please reach out to us regardless of where you are in your training, testing, and contingency planning process.
